The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election without traverse of Invention I claims 1-7 in the reply filed on 12/27/04 is acknowledged.

Claims 8-17 are withdrawn from further consideration pursuant to 37 CFR

1.142(b) as being drawn to a nonelected Invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 12/27/04.

## Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 3 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In this case, claims 3 and 7 recites the function of "comparing the decapsulized datagrams and deleting the datagram having an error at comparing result".

Specification page 12, lines 1-10 discloses the step S1003 and S1007 and merely recites the claimed limitation. It is known to one skilled that "checksum field" is one method of determining error in the datagram. However, the specification is lacking on how the datagrams are compared to each other to be selected to the upper layer. The

Art Unit: 2663

specification should provide a clearly description on how the comparing the datagrams with each other for error detection to avoid undue experimentation. Merely disclosing, "selects one of the others based on a predetermined rule, for example, a network control protocol", is inadequate to support the claimed function. Clearly, there are numerous network control protocols.

## Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Chuah et al U.S. Patent Number 6,577,644.

Re Claims 1 and 4, fig. 4 teaches Peer A establishing multiple PPP sessions with Peer B whereby the session are classified, processed and selected by the Peers by QoS options within the datagram. It is inherent that all datagrams are received from the physical layer (See col. 4, lines 1-32).

Re Claims 2, 6, refer to Claim 1, wherein the datagrams are inherently encapsulated and decapsulated at each peer for packet processing.

Re Claim 5, refer to Claim 1, wherein each Peer inherently have a first and second management planes for establishing multiple PPP session with each other.

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
  - U.S. Patent Number 6,160,808 teaches transmitting multi-link PPP;
  - U.S. Patent Number 6,778,495 teaches load balancing over a multilink bundle.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Ngo can be reached on 571-272-3139. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
